Dashboards & Widgets

Adapted from Wikipedia:

- **Dashboard**: easy to read, often single page user interface providing a graphical presentation of the current status and historical trends of an organization or region's key indicators, enabling informed decision making and planning. Generally customizable through add-ons or widgets.

Widget

- **Simple stand-alone software application** (or "applet") designed to be **easy to use for specialized tasks**, including data visualization. Can allow the **sharing/publishing of information/data** across the internet, wherever the code can be installed.
- **Types** include
  - **Web widgets**, for use/embedding within webpages
  - **Desktop widgets**. for use directly on computers or mobile devices.
- **Example**: Configurable "Weather Report Widget" providing weather for particular time/location by accessing data from the Weather Channel.

Answer Questions
Alice Little @ Cheery Farm: I am stumped. How can I show the USDA that people are willing to pay more for organic vegetables? Has anyone else filled out their loan application forms and can provide guidance? I am from Northern California, if that helps. Thanks!!
